

Build A Competitive Workforce With **PCRecruiter**

Who Uses **PCRecruiter**?

Worldwide, over 3,000 organizations use **PCRecruiter**. They cover all segments of HR, recruiting, staffing and executive search.

Our clients have included household names and Fortune 500 companies to single recruiter operations. As successful recruiting is built on trust and discretion, we prefer not to disclose our client's names, but we are happy to provide testimonials to qualified prospects.

In fact, **PCRecruiter** has everything a search pro needs at their fingertips:

- Intuitive drag and drop pipeline
- Browser extension for faster sourcing
- Complete Outlook and Gmail integrations
- User-configurable fields and screen layouts
- Convenient mobile app
- Custom lists for easy organizing and searching
- Analytics tracking to measure recruiting efforts
- Custom forms and templates
- Process tracking and placement reports
- Open API for custom development

Remember the first generation of applicant tracking software (ATS) programs?

They were great at reducing paperwork... and that was about it. There were so many gaps in the system that it felt like you were just plugging holes in a semi-automated recruitment 'process'.

Even though your team might have been admin-efficient, were you actually acquiring, developing, and retaining the best talent available? Probably not always.

Stay Ahead of the Recruitment Curve

Recruitment has changed. If you can build an engaged and productive workforce, and retain them, you're going to see impact in your business. It's going to need the right marketing and the right engagement with the right people. And it's going to need the right applicant tracking software to help streamline your talent acquisition program, keep the time-to-fill competitive, and minimize your cost-per-hire.

So if you're looking for applicant tracking software with dynamic customization, an intuitive user-interface plus immediate, responsive, and industry-leading customer support, **PCRecruiter** is the winning choice.

What Is PCRecruiter & What Can It Do For My Business?

Developed by a world leader in recruitment software, [Main Sequence Technology Inc. \(MST\)](#), **PCRecruiter** is a robust, versatile and user-friendly applicant tracking system designed for recruitment professionals.

Customer feedback tells us that the interface is easy to work and offers effective customization. But there are a host of other features that make **PCRecruiter** excel.

Seamless integration allows you to connect your favorite apps and services – from Microsoft Outlook to RingCentral. Designed to improve the efficiency of your workflows, **PCRecruiter** is there to make the recruitment process easier – not more complicated.

So Why Use PCRecruiter?

We know that recruitment CRM software alone is not going to solve your needs (that's your job). But it can help.

In 2020, **PCRecruiter** was used to make over 30,000 placements and had an average of 6,500 active users per day. On average, the time-to-fill was 60 days.

We know that a one-size-fits-all approach isn't going to fit your business model. That's why **PCRecruiter** is modeled on usability, flexibility, and integrated functionality.

PCRecruiter's Functionality Includes:

- White-labeled job boards
- Automated activity tracking
- Automated activity tracking
- IMAP email logging
- Event calendar
- Bulk email capabilities
- Email response control
- Contractor time tracking
- Secure data hosting and backup

“It has several integration tools that make it easy to import, and export data, keep track of candidates and clients – and overall make my life easier!”

Review on G2

When Matching, Does PCRecruiter Use AI?

PCRecruiter is designed to put the information required for decision making at your fingertips, allowing you to make the choices.

Our current development policy means that whilst **PCRecruiter** may make deductive decisions about contact information, it does not make deductive decisions that could impact employment opportunities.

How Much Does It Cost?

PCRecruiter is designed to suit a broad range of clients. For that reason, our pricing also follows a flexible model.

Competitive Monthly Option

PCRecruiter accounts start at around **\$85 per user per month for a basic two-year contract.**

This price includes access to the current version of PCRecruiter, secure storage of your individual database(s) with daily backups, as well as our award-winning support and service.

One-Time Setup

There's a one-time fee assessed for initial setup and training, which will vary based on the needs of your organization.

One-Time Data Migration?

Costs for migration of data from your previous software provider are highly competitive, but are dependent on the complexity of the transfer.

Additional Specialist Services

We also offer additional user training, custom HTML work, and specialized technical support at nominal prices.

Main Sequence can also provide services via an international network of vendor partner providers, depending on your region and language.
